HEET SHAH

PROFESSIONAL SUMMARY

Having more than 3 years of experience in software industry from Test Automation Engineer to Full-stack Javascript developer, I'm always passionate about learning the latest and greatest technologies whether that's the front-end or back-end

WORK HISTORY

Backend Developer, 02/2021 to Current
GoDutch - Mumbai, India

- Build SMS-Reader Service which analysis,creates, and categorized personal expense. Millions of transactional messages were processed and thousands were categorized.
- Worked with growth team and built a portal to handled the Campus ambassador program
- Tech Stack: Node JS, AWS (lambda, EC2, RDS), React, Redux

JavaScript Developer, 05/2020 to 02/2021
MakeStories - Mumbai

- Build a real-time collaboration feature at MakeStories using NodeJS, SocketIO.js, and Redux.
- Build a commenting feature for the product and developed it as an SDK so that could be used for our upcoming products (NodeJS, MongoDB and React).
- Worked with network18 as a vendor and helped them to migrate their legacy code to NextJS (server-side rendering)

Automation Test Engineer, 04/2018 to 04/2020
Barclays - Pune, India

- Design test plans, scenarios, scripts, or procedures were some of the daily responsibilities.
- Built a utility to track the payment flow from downstream and upstream services.
- Tech Stack: Java, Selenium, Cucumber, React, MySQL.
